CONCEPT 04 · OWN DIRECTION

The keystone

The keystone is the last stone set in an arch, the one that holds the others in place under load. It carries ج, the initial of الجندي. A quiet reference to cassation, where a whole case rests on one point of law.

SMALL SIZES · SOCIAL

Joints drop out below ~80 px; at 16 px the plain gold keystone alone still reads as the firm.

CONCEPT 05 · OWN DIRECTION

Bilingual balance

No symbol at all. The Arabic and English names sit at equal weight either side of one gold rule, each read from the centre outward. Balance is shown by the layout itself, not by an icon. Geometric Kufi gives it a modern, sober tone.

SMALL SIZES · SOCIAL

E | ج

The paired initials work to ~48 px; below that only ج remains. This is the weakest concept at small sizes.

CONCEPT 02

Pillar of balance

A three-fluted column built only from rectangles. The beam above rests on a single pivot, so the column also reads as an even balance, without drawing scales.

SMALL SIZES · SOCIAL

The fluting closes up below ~40 px, so small sizes use a solid shaft: beam, column, base.
